As part of DataHaven’s 25th Anniversary, we are proud to highlight the creativity and ingenuity of those who help make Connecticut a better place. The Second Annual DataHaven Innovation Awards will recognize organizations and individuals who have demonstrated the ability to use data to improve the well-being of Connecticut communities.

DataHaven Innovation Awards - Data for Community Impact

Awards in this category recognize the outstanding use of data to make a positive difference in one or more Connecticut communities. **Who should apply?** Nonprofits, for-profit, funders, unincorporated groups, municipal and state government agencies.

**Examples:**
- A city agency successfully used data to demonstrate the need for a new policy or new legislation to improve local health conditions.
- A neighborhood association used data from the DataHaven Community Wellbeing Survey to lobby for new bus services in their area, improving access to employment.

DataHaven Innovation Awards - Data in Education

Awards in this category recognize the outstanding use of data for projects developed within a classroom or educational setting. Nominations will be accepted for K-12 projects as well as university and graduate level projects. **Who should apply?** Teachers, students, school-based organizations, university instructors, non-profits working with youth.

**Examples:**
- An 8th-grade class used the Greater Hartford Community Wellbeing Index 2019 and the latest U.S. Census data to create a curriculum to engage students in a data-driven dialogue about how to improve their local community.
- A college-based program engages students and residents in mapping health issues.
