Compiled by DataHaven in August 2023.

This report is designed to inform local-level efforts to improve community well-being and racial equity. This is version 2.0 of the DataHaven region equity profile, which DataHaven has published for all 169 towns and several regions of Connecticut. Please contact DataHaven with suggestions for version 3.0 of this report.

ctdatahaven.org

EXECUTIVE SUMMARY

Throughout most of the measures in this report, there are important differences by race/ethnicity and neighborhood that reflect differences in access to resources and other social needs. Wherever possible, data are presented with racial/ethnic breakdowns, as defined by existing federal data collection standards. However, for smaller groups or more detailed breakdowns, some values may not be available or have less reliable data. In these cases, values are marked as “N/A,” not available.

Federal and statewide approaches to data collection, including small sample sizes, tend to hide disparities within certain population groups. This does not mean that a given population is not impacted by inequitable social conditions. DataHaven and other organizations often collect information on demographic characteristics besides race/ethnicity, and encourage further analysis and advocacy that can lead to more inclusive data reporting. Please contact DataHaven at info@ctdatahaven.org with questions about additional reporting that may be possible.

- Northwest Hills COG is a region of **112,503 residents**, **15 percent** of whom are people of color. The region’s population has decreased by **2 percent** since 2010.
- Of the region’s **45,233 households**, **76 percent** are homeowner households.
- **Thirty percent** of Northwest Hills COG’s households are cost-burdened, meaning they spend at least 30 percent of their total income on housing costs.
- Among the region’s adults ages 25 and up, **36 percent** have earned a bachelor’s degree or higher.
- Northwest Hills COG is home to **35,243 jobs**, with the largest share in the Health Care and Social Assistance sector.
- The median household income in Northwest Hills COG is **\$83,512**.
- As of 2015, Northwest Hills COG’s average life expectancy was **80.3 years**.
- **Sixty percent** of adults in Northwest Hills COG say they are in excellent or very good health.
- In 2021, **38 people** in Northwest Hills COG died of drug overdoses.
- **Eighty-five percent** of adults in Northwest Hills COG are satisfied with their area, and **59 percent** say their local government is responsive to residents’ needs.
- In the most recent state election, **67 percent** of registered voters in Northwest Hills COG voted.
- **Thirty-nine percent** of adults in Northwest Hills COG report having stores, banks, and other locations in walking distance of their home, and **37 percent** say there are safe sidewalks and crosswalks in their neighborhood.

OVERVIEW

For the purposes of this report, Northwest Hills COG will be compared to Connecticut as a whole, as well as to Torrington whenever possible. Some indicators are only reliably available by county; in these cases, values will instead be shown for Litchfield County. Where necessary, data may be presented for a proxy region made up of public use microdata areas (PUMAs) designated by the US Census Bureau, including parts of Hartford County and all of Litchfield County. **Charts and tables based on these proxy areas are noted as such in their titles.**

Northwest Hills COG is made up of the following towns (with 2020 populations):

- Barkhamsted (3,647)
- Burlington (9,519)
- Canaan (1,080)
- Colebrook (1,361)
- Cornwall (1,567)
- Goshen (3,150)
- Hartland (1,901)
- Harwinton (5,484)
- Kent (3,019)
- Litchfield (8,192)
- Morris (2,256)
- New Hartford (6,658)
- Norfolk (1,588)
- North Canaan (3,211)
- Roxbury (2,260)
- Salisbury (4,194)
- Sharon (2,680)
- Torrington (35,515)
- Warren (1,351)
- Washington (3,646)
- Winchester (10,224)

The proxy study area is made up of the following locations (with 2020 populations):

- PUMA 0900304 (113,853)
- PUMA 0900500 (Litchfield County) (185,186)

DEMOGRAPHICS

As of 2020, the population of Northwest Hills COG is 112,503, including 20,146 children and 92,357 adults. Fifteen percent of Northwest Hills COG’s residents are people of color, compared to 37 percent of residents statewide.

TABLE 2: POPULATION BY RACE/ETHNICITY, 2020

Area	White		Black		Latino		Asian		Other race/ethnicity	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	2,279,232	63%	360,937	10%	623,293	17%	170,459	5%	172,023	5%
Northwest Hills COG	95,231	85%	1,640	1%	8,684	8%	1,851	2%	5,097	5%
Torrington	26,308	74%	1,060	3%	5,433	15%	891	3%	1,823	5%

As Connecticut’s predominantly white Baby Boomers age, younger generations are driving the state’s increased racial and ethnic diversity. Black and Latino populations in particular skew much younger than white populations.

FIGURE 2: POPULATION BY RACE/ETHNICITY AND AGE GROUP, 2021

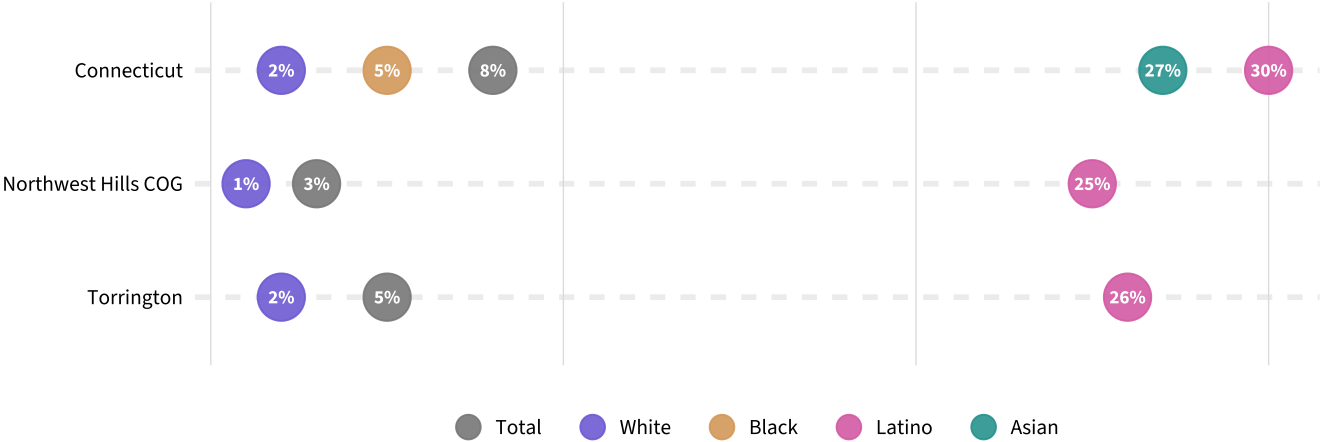

Note: Only groups with at least 50 residents in each age group shown.

About 7,942 residents of Northwest Hills COG, or 7 percent of the population, are foreign-born. The largest number of immigrants living in Northwest Hills COG were born in Ecuador, followed by Italy and Poland.

Linguistic isolation is characterized as speaking English less than “very well.” People who struggle with English proficiency may have difficulty in school, seeking health care, accessing social services, or finding work in a largely English-speaking community. As of 2021, 3,321 Northwest Hills COG residents, or 3 percent of the population ages 5 and older, had limited English proficiency. Latinos and Asian Americans are more likely to have limited English proficiency than other racial/ethnic groups.

FIGURE 3: LINGUISTIC ISOLATION BY RACE/ETHNICITY, 2021

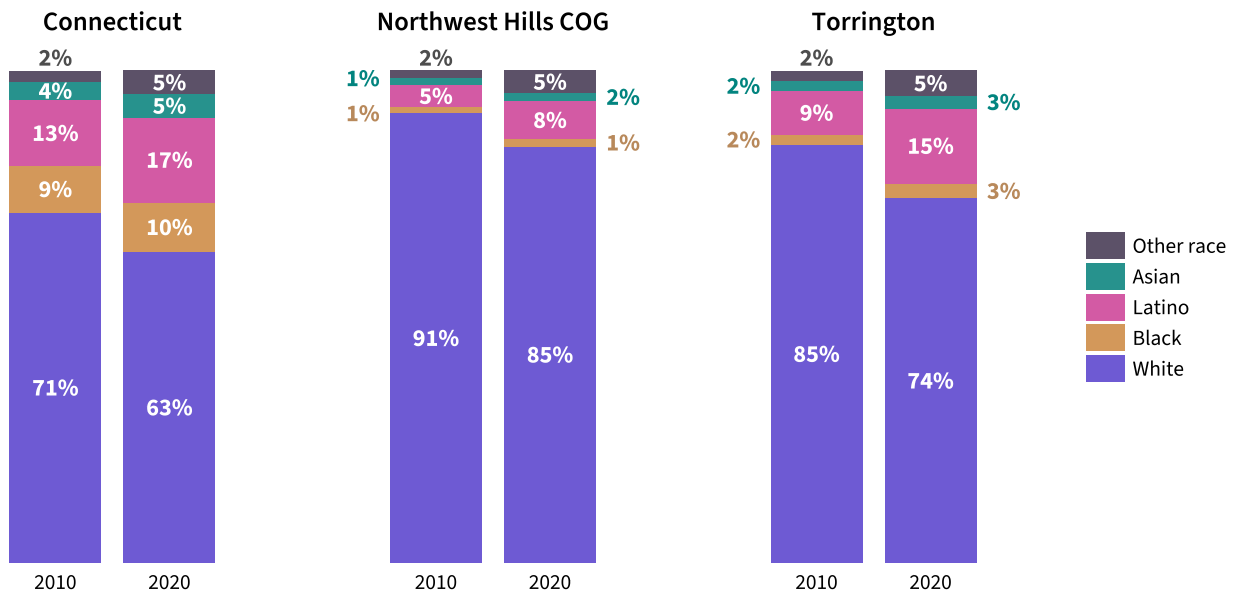

POPULATION CHANGE: 2020 CENSUS

The first set of data from the 2020 Census was released in August 2021, containing basic population counts by age and race/ethnicity. Between 2010 and 2020, Connecticut’s population was nearly stagnant. During the same period, Northwest Hills COG shrank by 2,744 people, a 2.4 percent decrease. The number of white residents in Northwest Hills COG shrank by 9.6 percent, while the non-white population grew by 74 percent.

TABLE 3: POPULATION AND POPULATION CHANGE BY AGE GROUP, 2010–2020

Area	Age	Population, 2010	Population, 2020	Change	Percent change
Connecticut	All ages	3,574,097	3,605,944	+31,847	+0.9%
	Children (0–17)	817,015	736,717	–80,298	–9.8%
	Adults (18+)	2,757,082	2,869,227	+112,145	+4.1%
Northwest Hills COG	All ages	115,247	112,503	–2,744	–2.4%
	Children (0–17)	24,560	20,146	–4,414	–18.0%
	Adults (18+)	90,687	92,357	+1,670	+1.8%
Torrington	All ages	36,383	35,515	–868	–2.4%
	Children (0–17)	7,659	6,549	–1,110	–14.5%
	Adults (18+)	28,724	28,966	+242	+0.8%

FIGURE 4: SHARE OF POPULATION BY RACE/ETHNICITY, 2010–2020

HOUSING

Northwest Hills COG has 45,233 households, of which 76 percent are homeowner households. Of the region’s 55,221 housing units, both occupied and vacant, 78 percent are in single-family buildings and 22 percent are in multifamily buildings.

Homeownership rates vary by race/ethnicity. Purchasing a home is more attainable for advantaged groups because the process of purchasing a home has a long history of racially discriminatory practices that continue to restrict access to homeownership today. This challenge, coupled with municipal zoning dominated by single-family housing, results in de facto racial and economic segregation seen throughout Connecticut.

TABLE 4: HOMEOWNERSHIP RATE BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021

Area	Total	White	Black	Latino	Asian
Connecticut	66%	76%	41%	37%	60%
Northwest Hills COG	76%	78%	62%	36%	60%
Torrington	68%	71%	N/A	37%	72%

Younger adults are less likely than older adults to own their homes across several race/ethnicity groups. However, in most towns, younger white adults own their homes at rates comparable to or higher than older Black and Latino adults.

FIGURE 5: HOMEOWNERSHIP RATES BY AGE AND RACE/ETHNICITY OF HEAD OF HOUSEHOLD, NORTHWEST HILLS COG, 2021 (WITH PROXY AREA)

A household is cost-burdened when they spend 30 percent or more of their income on housing costs, and severely cost-burdened when they spend half or more of their income on housing costs. Housing costs continue to rise, due in part to municipal zoning measures that limit new construction to very few towns statewide. Cost-burden generally affects renters more than homeowners, and has greater impact on Black and Latino householders. Among renter households in Northwest Hills COG, 44 percent are cost-burdened, compared to 25 percent of owner households.

FIGURE 6: HOUSING COST-BURDEN RATES BY RACE/ETHNICITY, 2021 (WITH PROXY AREA)

Household overcrowding is defined as having more than one occupant per room. Overcrowding may increase the spread of illnesses among the household and can be associated with higher levels of stress. Increasing the availability of appropriately-sized affordable units helps to alleviate overcrowding.

TABLE 5: OVERCROWDED HOUSEHOLDS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021

Area	Total		White		Black		Latino		Asian	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	27,078	2%	7,418	1%	4,868	3%	10,971	6%	3,445	6%
Northwest Hills COG	519	1%	331	1%	<50	N/A	122	7%	<50	N/A
Torrington	250	2%	184	1%	<50	N/A	<50	N/A	<50	N/A

EDUCATION

Public school students in Northwest Hills COG are served by 18 school districts for pre-kindergarten through grade 12, including 5 regional districts. During the 2022-23 school year, there were a total of 12,147 students enrolled in these districts, with 3,883 enrolled in the Torrington School District. Tracking student success measures is important since disparate academic and disciplinary outcomes are observed as early as preschool and can ultimately affect a person’s long-term educational attainment and economic potential.

FIGURE 7: PUBLIC K-12 STUDENT ENROLLMENT BY RACE/ETHNICITY PER 100 STUDENTS, 2022-23

FIGURE 8: SELECTED ACADEMIC AND DISCIPLINARY OUTCOMES BY STUDENT RACE/ETHNICITY, 2020-21 AND 2021-22 SCHOOL YEARS

Adults with high school diplomas or college degrees have more employment options and considerably higher potential earnings, on average, than those who do not finish high school. In Northwest Hills COG, 6 percent of adults ages 25 and over, or 5,358 people, lack a high school diploma; this share is 9 percent statewide and 10 percent in Torrington.

FIGURE 9: EDUCATIONAL ATTAINMENT BY RACE/ETHNICITY, SHARE OF ADULTS AGES 25 AND UP, 2021

ECONOMY

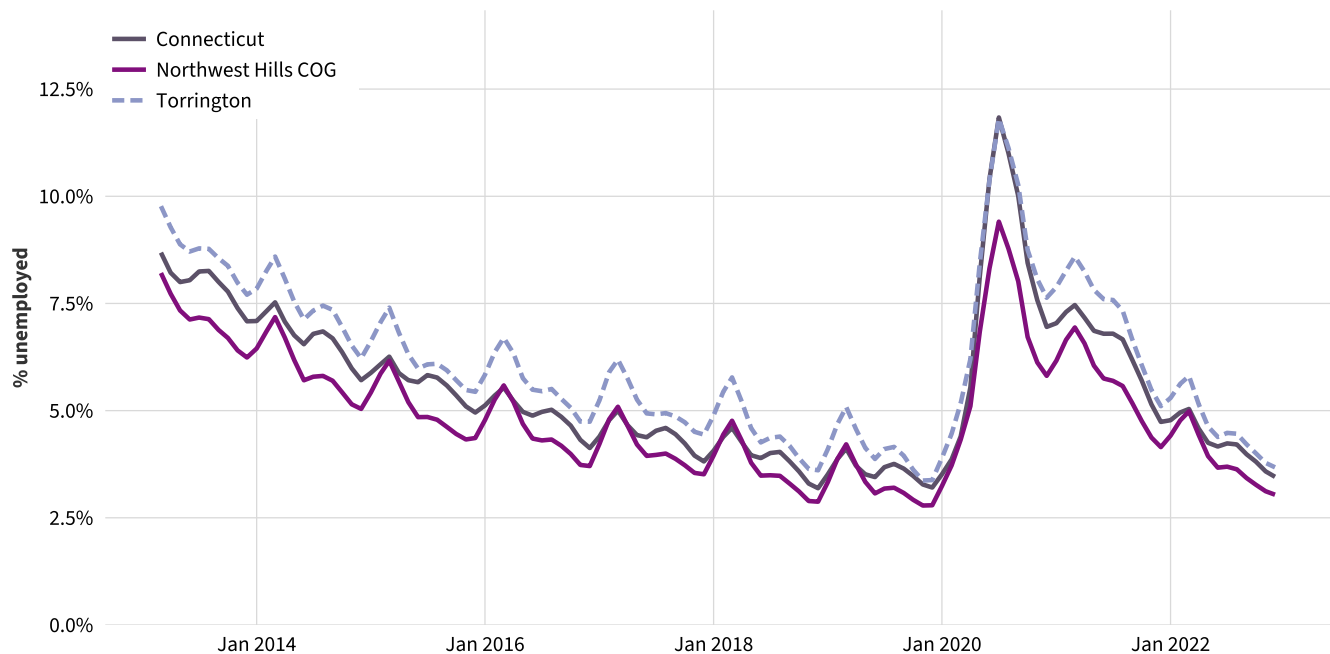

At the end of 2021, there were 35,243 total jobs based in towns in Northwest Hills COG, with 14,175 of these based in Torrington. The Health Care and Social Assistance sector comprises the largest share of jobs in the region. While many industries saw major job losses early on in the COVID-19 pandemic, by early 2023 the number of jobs statewide had nearly caught back up to pre-pandemic counts.

TABLE 6: JOBS AND WAGES IN NORTHWEST HILLS COG’S 5 LARGEST SECTORS, 2021

Sector	Connecticut		Northwest Hills COG	
	Total jobs	Avg annual pay	Total jobs	Avg annual pay
All Sectors	1,591,760	\$77,816	35,243	\$55,329
Health Care and Social Assistance	267,984	\$60,835	6,210	\$53,095
Retail Trade	167,286	\$41,652	4,386	\$38,239
Manufacturing	152,860	\$89,604	3,424	\$67,554
Accommodation and Food Services	111,160	\$26,767	2,688	\$27,189
Construction	59,323	\$77,099	2,091	\$73,161

Nationwide, the onset of the pandemic led to a huge spike in unemployment rates, mirrored across Connecticut. At its peak in July 2020, Connecticut’s unemployment rate was 12.0 percent. As of December 2022, unemployment rates statewide and in Northwest Hills COG were 3.2 percent and 2.9 percent, respectively

FIGURE 10: MONTHLY UNEMPLOYMENT RATE, 2013–2022, 3-MONTH ROLLING AVERAGE

Individual earnings vary by race/ethnicity, sex, and other characteristics. These can be measured comparing the differences in average earnings between groups. White workers and men often out-earn workers of color and women. These trends hold even when controlling for educational attainment and within many occupational groups.

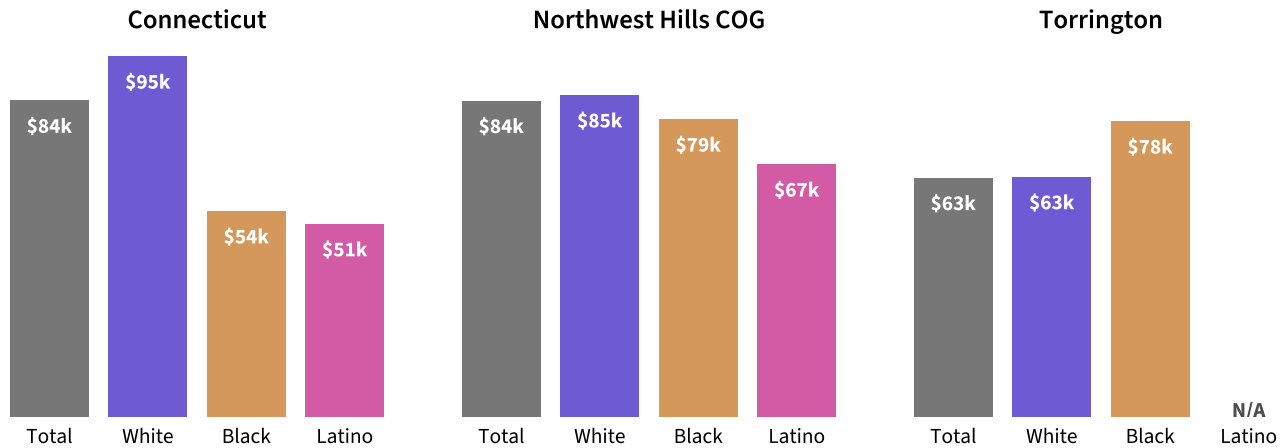

FIGURE 11: MEDIAN INCOME BY RACE/ETHNICITY AND SEX FOR FULL-TIME WORKERS AGES 25 AND OVER WITH POSITIVE INCOME, 2021 (WITH PROXY AREA)

INCOME & WEALTH

The median household income in Northwest Hills COG is \$83,512, compared to \$83,572 statewide. Town-level median household incomes range from \$60,789 in North Canaan to \$143,038 in Burlington. Racial disparities in outcomes related to education, housing, employment, and wages result in disparate household-level incomes and overall wealth. Households led by Black or Latino adults generally average lower incomes than white households.

FIGURE 12: MEDIAN HOUSEHOLD INCOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021 (WITH PROXY AREA)

Between the Great Recession and the COVID-19 pandemic, average incomes have not kept pace with inflation over the past two decades. Connecticut’s median household income was \$83,572 in 2021; adjusted for inflation, this was \$1,365 lower than in 2000.

TABLE 7: MEDIAN HOUSEHOLD INCOME IN LARGE TOWNS, 2000–2021, IN 2021 DOLLARS

Area	Income, 2000	Income, 2021	Change, 2000-2021	Percent change
Harwinton	\$104,287	\$118,508	+\$14,221	+13.6%
Burlington	\$130,254	\$143,038	+\$12,784	+9.8%
Litchfield	\$91,997	\$98,286	+\$6,289	+6.8%
Connecticut	\$84,937	\$83,572	-\$1,365	-1.6%
Torrington	\$65,891	\$63,135	-\$2,756	-4.2%
New Hartford	\$109,167	\$100,156	-\$9,011	-8.3%
Winchester	\$73,498	\$65,537	-\$7,961	-10.8%

The Supplemental Nutritional Assistance Program (SNAP, or food stamps) is a program available to very low-income households earning less than 130 percent of the federal poverty guideline (\$26,500 for a family of four in 2021). Throughout the state, poverty and SNAP utilization rates are higher among Black and Latino households than white households.

With many of the safety measures early in the COVID-19 pandemic, having reliable, high-speed internet at home became a necessity for remote participation in school, expanded job opportunities, and telehealth. Statewide, Black and Latino residents are slightly more likely than average to live in a household without broadband access.

Access to a personal vehicle may also be considered a measure of financial security since reliable transportation plays a significant role in job access and quality of life. Vehicle access reduces the time a family may spend running errands or traveling to appointments, school, or work.

TABLE 8: SELECTED ECONOMIC RESOURCES BY RACE/ETHNICITY, 2021

HEALTH

The socioeconomic disparities described above tend to correlate with health outcomes. Factors such as stable housing, employment, literacy and linguistic fluency, environmental hazards, and transportation all impact access to care, physical and mental health outcomes, and overall quality of life. Income and employment status often drive differences in access to healthcare, the likelihood of getting preventive screenings as recommended, the affordability of life-saving medicines, and the ability to purchase other goods and services, including high-quality housing and nutritious food.

Life expectancy is a good proxy for overall health and well-being since it is the culmination of so many other social and health factors. The average life expectancy is 80.3 years in Northwest Hills COG, and 80.3 years statewide. Across the region, this ranges from 74.4 years in North Canaan to 85.6 in Norfolk.

FIGURE 13: LIFE EXPECTANCY, NORTHWEST HILLS COG BY CENSUS TRACT, 2015

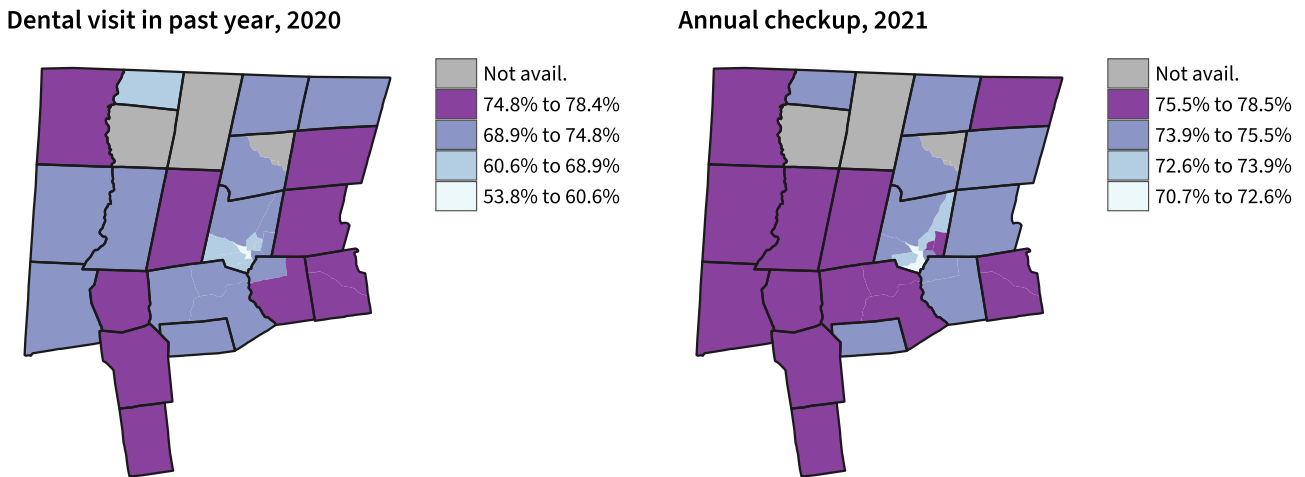

Health-related challenges begin with access to care. Due to differences in workplace benefits, income, and eligibility factors, Black and especially Latino people are less likely to have health insurance than white people.

FIGURE 14: UNINSURED RATE AMONG ADULTS AGES 19–64 BY RACE/ETHNICITY, 2021

Preventive care can help counteract economic disadvantages, as a person’s health can be improved by addressing risk factors like hypertension and chronic stress early. Lack of affordable, accessible, and consistent medical care can lead to residents relying on expensive emergency room visits later on. Overall, 75 percent of the adults in Northwest Hills COG had an annual checkup as of 2021, and 72 percent had had a dental visit in the past year.

FIGURE 15: PREVENTIVE CARE MEASURES, SHARE OF ADULTS BY CENSUS TRACT, NORTHWEST HILLS COG

Throughout the state, people of color face greater rates and earlier onset of many chronic diseases and risk factors, particularly those that are linked to socioeconomic status and access to resources. For example, diabetes is much more common among older adults than younger ones, yet middle-aged Black adults in Connecticut have higher diabetes rates than white seniors.

FIGURE 16: SELECTED HEALTH RISK FACTORS, SHARE OF ADULTS, 2015–2021

FIGURE 17: CHRONIC DISEASE PREVALENCE, SHARE OF ADULTS BY CENSUS TRACT, NORTHWEST HILLS COG

High blood pressure, 2021

Coronary heart disease, 2021

Current asthma, 2021

Diabetes, 2021

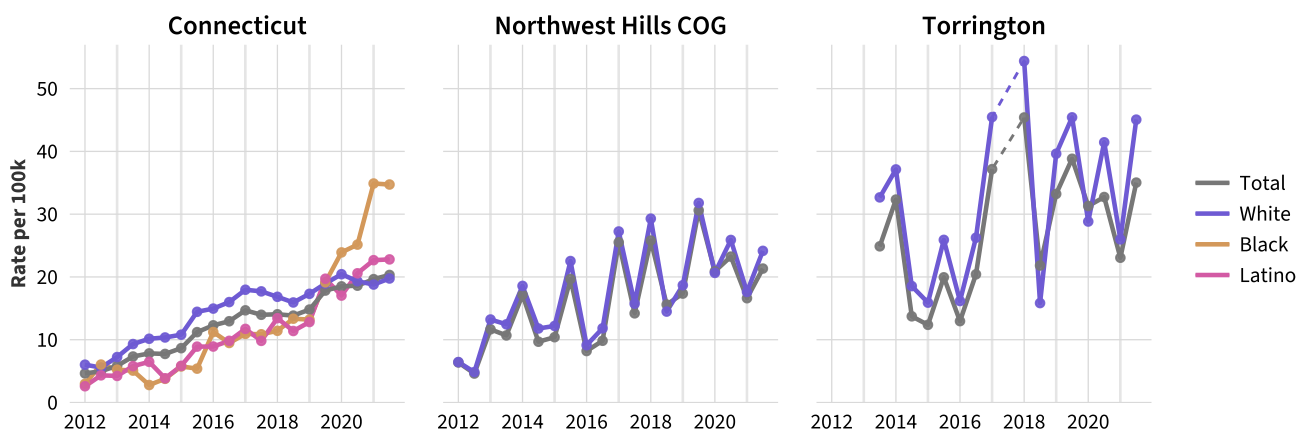

Mental health issues like depression and anxiety can be linked to social determinants like income, employment, and environment, and can pose risks of physical health problems as well, including by complicating a person’s ability to keep up other aspects of their health care. People of color are slightly more likely to report feeling mostly or completely anxious and being bothered by feeling depressed or hopeless. Overall, 10 percent of Northwest Hills COG adults report experiencing anxiety regularly and 9 percent report being bothered by depression.

TABLE 10: SELECTED MENTAL HEALTH INDICATORS, SHARE OF ADULTS, 2015-2021

Like other states, Connecticut has seen a rise in drug overdose deaths in the last several years. In 2021, Connecticut saw an average of 122 overdose deaths per month, up from 59 in 2015. White residents long comprised the bulk of these deaths, but as overall overdose death rates have risen, an increasing share of those deaths have been people of color.

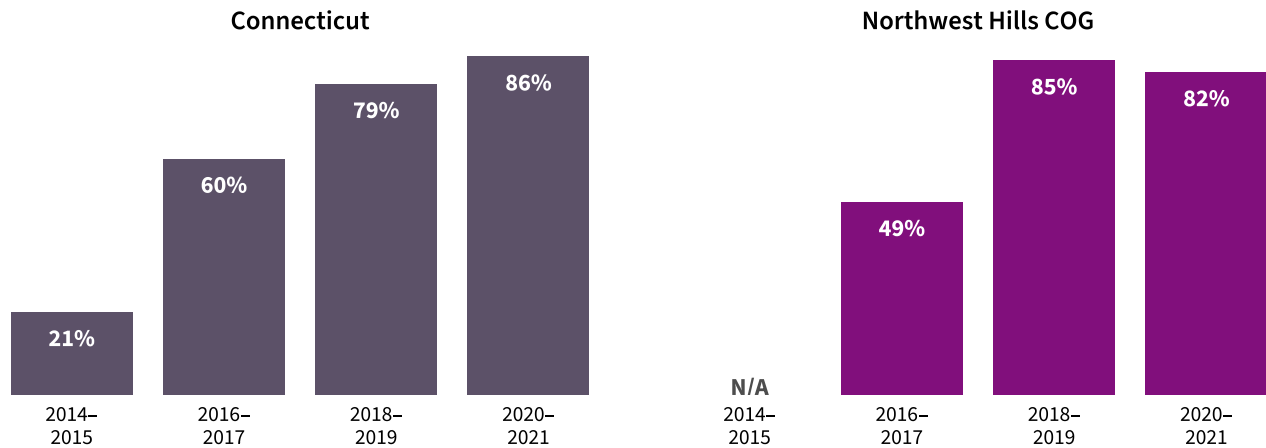

FIGURE 18: AGE-ADJUSTED SEMI-ANNUAL RATES OF DRUG OVERDOSE DEATHS PER 100,000 RESIDENTS BY RACE/ETHNICITY, 2012-2021

Note: Values are suppressed for small populations or few overdose incidents. Dashed lines indicate periods where values are suppressed or otherwise unavailable.

The introduction and spread of fentanyl in drugs—both with and without users’ knowledge—is thought to have contributed to this steep rise in overdoses. In 2016 and 2017, 49 percent of the drug overdose deaths in Northwest Hills COG involved fentanyl; in 2020 and 2021, this share was 82 percent.

FIGURE 19: SHARE OF DRUG OVERDOSE DEATHS INVOLVING FENTANYL, 2012–2021

Sexually transmitted infections (STIs) can have long-term implications for health, including reproductive health problems and certain cancers, and can increase the risk of acquiring and transmitting diseases such as HIV and hepatitis C. Following nationwide trends, Connecticut has seen increases in the rates of STIs like chlamydia and gonorrhea over the past two decades. Between 2018 and 2020, Litchfield County had annual average case rates of 186 new cases of chlamydia per 100,000 residents, 47 cases of gonorrhea per 100,000, and 3.0 cases of syphilis per 100,000.

FIGURE 20: ANNUALIZED AVERAGE RATES OF NEW CASES OF SELECTED SEXUALLY TRANSMITTED INFECTIONS PER 100,000 RESIDENTS, 2000–2020

As with many other diseases, Connecticut’s Black and Latino residents face a higher burden of HIV rates. Statewide between 2016 and 2020, Black residents ages 13 and up were nearly 10 times more likely to be diagnosed with HIV than white residents.

FIGURE 21: ANNUALIZED AVERAGE RATE OF NEW HIV DIAGNOSES PER 100,000 RESIDENTS AGES 13 AND OVER, 2016–2020

Birth outcomes often reflect health inequities for parents giving birth, and those outcomes can affect a child throughout their life. Often, parents of color have more complications related to birth and pregnancy than white parents. Complications during pregnancy or childbirth also contribute to elevated mortality among parents giving birth.

TABLE 11: SELECTED BIRTH OUTCOMES BY RACE/ETHNICITY OF PARENT GIVING BIRTH, 2017–2021

Children under 7 years old are monitored annually for potential lead poisoning, based on having blood-lead levels in excess of the state’s accepted threshold. Between 2018 and 2020, 2.1 percent of children tested in Northwest Hills COG were found to have elevated lead levels. Children living in homes built before 1960 are at a higher risk of potential lead poisoning due to the more widespread use of lead-based paints in older homes. Black and Latino households are more likely to live in these older buildings.

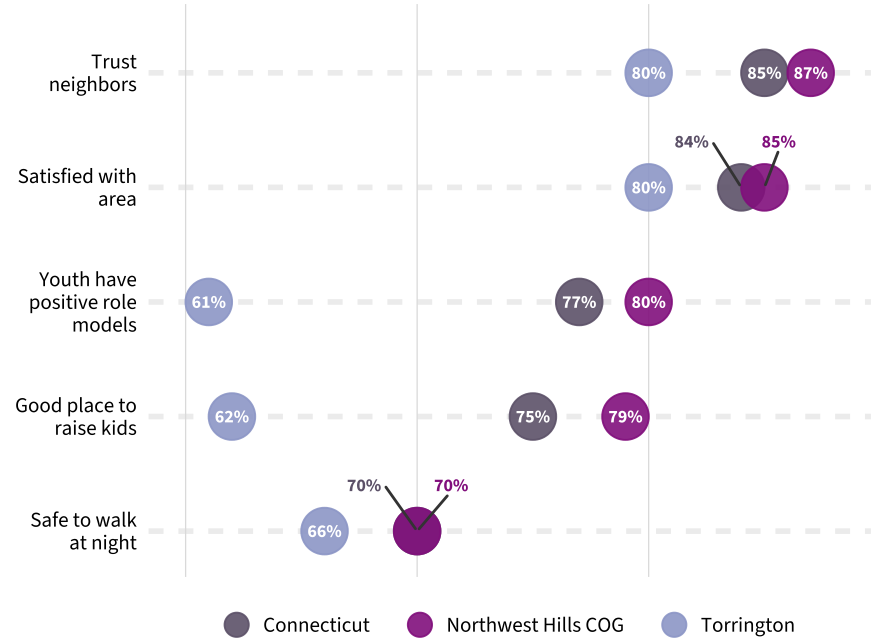

TABLE 12: HOUSEHOLDS LIVING IN STRUCTURES BUILT BEFORE 1960 BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2021 (WITH PROXY AREA)

CIVIC LIFE & COMMUNITY COHESION

Beyond individual health, several measures from the DataHaven Community Wellbeing Survey show how local adults feel about the health of their neighborhoods. High quality of life and community cohesion can positively impact resident well-being through the availability of resources, sense of safety, and participation in civic life. For example, adults who see the availability of role models in their community may enroll their children in extracurricular activities that benefit them educationally and socially; residents who know and trust their neighbors may find greater social support. Overall, 85 percent of Northwest Hills COG adults report being satisfied with the area where they live.

FIGURE 23: RESIDENTS' RATINGS OF COMMUNITY COHESION MEASURES, SHARE OF ADULTS, 2015-2021

Crime rates are based on reports to law enforcement of violent force against persons, as well as offenses involving property. Not all crimes involve residents of the areas where the crimes occur, which is important to consider when evaluating crime rates in areas or towns with more commercial activity. Crime patterns can also vary dramatically by neighborhood. Crime can impact the social and economic well-being of communities, including through negative health effects.

FIGURE 24: GROUP A CRIME RATES PER 100,000 RESIDENTS BY TOWN / JURISDICTION, 2021

A lack of trust in and engagement with local government and experiences of unfair treatment by authorities can impair community well-being and cohesion. Fifty-nine percent of adults in Northwest Hills COG feel their local government is responsive to residents’ needs, compared to 53 percent of adults statewide.

TABLE 13: RESIDENTS’ RATINGS OF LOCAL GOVERNMENT, SHARE OF ADULTS, 2015–2021

Area	Local govt is responsive	Have some influence over local govt
Connecticut	53%	67%
Northwest Hills COG	59%	72%
Torrington	44%	63%

Eighty-three percent of Northwest Hills COG’s eligible voters, or 66,181 people, voted in the 2020 presidential election, and 67 percent (53,913 people) voted in the 2022 state election.

FIGURE 25: REGISTERED VOTER TURNOUT, 2020–2022

ENVIRONMENT & SUSTAINABILITY

Many environmental factors—from access to outdoor resources to tree canopy to exposure to pollutants—can have direct impacts on residents’ health and quality of life. Environmental justice is the idea that these factors of built and natural environments follow familiar patterns of socioeconomic disparities and segregation. The federal Environmental Protection Agency (EPA) ranks small areas throughout the US on their risks of exposure to a variety of pollutants and hazards, scaled to account for the historically disparate impact of these hazards on people of color and lower-income people.

FIGURE 26: EPA ENVIRONMENTAL JUSTICE INDEX BY BLOCK GROUP, NORTHWEST HILLS COG

Air toxics cancer risk

Lead paint exposure

Hazardous waste proximity

Wastewater discharge

High-quality built environment resources, such as recreational facilities and safe sidewalks, help keep residents active and bring communities together. Walkable neighborhoods may also encourage decreased reliance on cars. Throughout Connecticut, Black and Latino residents are largely concentrated in denser urban areas which tend to offer greater walkability. Of adults in Northwest Hills COG, 39 percent report having stores, banks, and other locations they need in walking distance, lower than the share of adults statewide.
